

★ ABOUT ACEER CONFERENCE

The ACEER conference was launched in 2019 in I-Shou University, Taiwan with an aim to provide a platform for international scientists and engineers to present and discuss recent advances, new techniques, and application in the field of Civil, Environmental, and Ecological Engineering.

For the past two years, ACEER conference has attracted around 200 participants from 21 countries and areas, and published about 100 full papers in conference proceedings and international journals.

The ACEER2021 conference program consists of four parts: Keynote Speech, Invited and Oral Presentation, Poster Presentation, and a field visit to Great Wall. For more information about the conference, please visit <http://www.aceerconf.org/>

ORGANIZING COMMITTEE

General Chair

Prof. Chih-Huang Weng, I-Shou University

Technical Program Committee (TPC)

Prof. Jamal Khatib, University of Wolverhampton, UK

Prof. Ricardo Gomes, Polytechnic of Leiria, Portugal

Prof. Giuseppe Oliveto, University of Basilicata, Italy

Prof. In-Seok Yoon, Induk University, South Korea

Prof. Loai Aljerf, Damascus University, Syria

Prof. Youichi Yasuda, Nihon University, Japan

Prof. Zaitao Pan, Saint Louis University, USA

Prof. Ruben Paul Borg, University of Malta, Malta

Dr. Hui Zhu, Chinese Academy of Sciences, China

Dr. Payam Shafigh, University of Malaya, Malaysia

Dr. Chunjiang An, Concordia University, Canada

Dr. Angela Dikou, PhD in Coral Reef Ecology, Greece

Dr. José P. P. Sánchez, University of Oviedo, Spain

Dr. Jian Deng, Lakehead University, Canada

Dr. Miguel Azenha, University of Minho, Portugal

Dr. Mirko Di Febbraro, University of Molise, Italy

Dr. Trung Ngo, University of Wollongong, Australia

Dr. Can Zhou, Texas A&M University, USA

.....

3rd International Conference on Advances in Civil and Ecological Engineering Research (ACEER 2021)

July 27-30 | Online: Beijing, China
2021 | Offline: Microsoft Teams

Organized by

I-Shou University
Dept. Civil and Ecological
Engineering

Sponsored by

PUBLICATIONS

- ◆ Conference Proceeding
- ◇ IOP Conference Series: Earth and Environmental Science (Indexed by: Scopus, EI Compendex , CPCI, etc)
- ◆ International Peer-reviewed Journals
- ◇ Environmental Science and Pollution Research (Springer, IF=3.056)
- ◇ Ecological Chemistry and Engineering S (Sciendo, IF=1.488)
- ◇ Journal of Hydrology and Hydromechanics (Sciendo, IF=2.011)
- ◇ Applied Ecology and Environmental Research (IF=0.712)
- ◇ Tecnología y Ciencias del Agua (IF: 0.289)

Ecology and Environment

- Sustainable Development
- Environmental Monitoring
- Environmental Landscaping
- Noise Treatment Engineering
- Water Pollution and Treatment
- Renewable Energy Technologies
- Meteorology and Climate Change
- Heavy Metals in the Environment
- Wetlands and Aquatic Ecosystems
- Protection and Reclamation of Soils
- Solid Waste Treatment and Disposal
- Air Quality and Atmospheric Pollution
- Restoration and Protection of Environment
- Cleaner Production and Recycling Economy
- Ecological Risk Assessment and Management
- Biogeochemistry and Biogeochemical Modelling

Beijing, also known as Peking, is the capital of the People's Republic of China and one of the most populous cities in the world. Beijing is the heart of China's history for centuries. The city is renowned for its opulent palaces, temples, and huge stone walls and gates. Its art treasures and universities have long made it a center of culture and art in China. It also serves as the most important transportation hub and port of entry.

Online Conference

ACEER2021 will also be held online via Microsoft Teams, view last year's Video Presentations [HERE](#)

CALL FOR PAPERS

Abstract/full papers could be submitted via www.aceerconf.org or info@aceerconf.org

The Great Wall at Mutianyu

It is one of the most well-known Great Wall sections in Beijing and played an important role among the Ming Great Wall sections.

The Tian'anmen Square

It sits in the heart of Beijing. As the largest city square in the world, it could hold one million people for a grand meeting.

The Summer Palace

Built in Qing Dynasty of China, it is the best-preserved imperial palace, honored as the "Museum of Imperial Gardens".

The Palace Museum Also known as Forbidden City, used to be the imperial palace of 24 emperors of the Ming and Qing dynasties, providing insight into the social development of late dynastic China. It is limiting the daily number of visitors to 80,000. **We could help our participants to book tickets in advance.**

IMPORTANT DATES

May 31, 2021
Submission Deadline

July 27, 2021
Offline Conference Registration
Online Microsoft Teams Testing

July 28-29, 2021
Keynote Speeches
Oral & Poster Presentations

July 30, 2021
One-day tour to Great Wall

Civil Engineering

- Cartography and Geographic Information System
- Construction Engineering and Management
- Green Building Technologies and Materials
- Hydraulic and Hydrologic Engineering
- Geological Resources and Engineering
- Tunnel, Subway and Underground
- Water Recourses Engineering
- Urban Planning and Design
- Transportation Engineering
- Geotechnical Engineering
- Earthquake Engineering
- Geological Engineering
- Coastal Engineering
- Bridge Engineering
- Fluid Mechanics
