

About ICBEB

The International Conference on Biomedical Engineering and Biotechnology (ICBEB), as an annual gathering, has been successfully held in the past eight years. It aims to provide an extensive platform for scientists/scholars to present their research results and newest findings in all fields of Biomedical Engineering and Biotechnology, discuss the practical challenges encountered and recommend better solutions for human health.

The plenary session includes keynote speeches, invited speeches, oral and poster presentations. International Workshop on Chemical Science and Pharmaceutical Research (CSPR) will be held synchronously.

China Physiological Signal Challenge (CPSC) concentrated on Searching for Premature Ventricular Contraction and Supraventricular Premature Beat from Long-term ECGs will be held during the conference.
